MUSTAFA MOIZ
SOFTWARE DEVELOPER

mustafaezzi143@gmail.com

+92-336-3399445

Haidery, North Nazimabad

PROFILE

I'm a software developer who loves building clean, functional, and user-friendly digital experiences. I work with Vue.js, Angular, React, Tailwind CSS, and Python, and I'm constantly learning new tools as I grow toward becoming a full-stack developer. I'm someone who actually enjoys solving problems and figuring things out, whether it's a tricky UI bug or a new feature that needs to be built.

SKILLS

Technical Skills

- Vue.js
- React
- Angular
- Tailwind CSS
- JavaScript / TypeScript
- Python
- Node.js
- REST APIs

Sales management

Malabis Garment Outlet – Saddar

2020-2021

Software Developer

5Cube - North Nazimabad, Haidery

2021-present

Software Developer

Trisite-Solutions – (Remote work)

2024-2025

RECENT WORK

Soolcy- Icecream Parlour App

- Developed Sooicy, a solo side-project e-commerce app for an online ice cream brand, using React.js, Python, and PostgreSQL. Built a full-featured platform for showcasing products, managing orders, and enabling seamless online sales, creating an engaging user experience from scratch.

Auction App

- Worked as assistant Developer to build a complete auction management application using Vue.js and Django, allowing users to create projects, register teams and players, manage auction settings, and run smooth, real-time auction sessions with an intuitive interface.

Invoice Management System

- Worked as a Full-Stack Developer to build a smart invoice management system using React.js and Node.js, automating billing, tracking payment statuses, managing clients, sending reminders, and streamlining all financial workflows through a smooth, user-friendly interface.

Predict The Pick

- Worked as a Full-Stack Developer on Predict the Pick, a real-time NFL app using Vue.js/Nuxt.js and Firebase, delivering live scores, player stats, team standings, news highlights, and personalized notifications for a dynamic fan experience.

Quiz App

- Worked as a Front-End Developer on QJ Challenges, an interactive quiz app built with React.js and Django, creating dynamic user interfaces for engaging quizzes, tracking user progress, and delivering a seamless and enjoyable learning experience.
